

SHINER GAZETTE

VOL. XVIII.

SHINER, LAVACA COUNTY, TEXAS, THURSDAY MORNING, JANUARY 12, 1911.

NO. 21

Science has developed something infinitely better than the old-style wrap or clamp.

"PITTSBURGH PERFECT" FENCES ARE WELDED BY ELECTRICITY.

This is the modern method of construction. Years of life are added through the elimination of serious fence defects.

A WRAP holds moisture, cracks the galvanizing and allows the water to attack the iron wire. A small amount of discolored galvanizing on "PITTSBURGH PERFECT" REINFORCES THE PROTECTION AGAINST RUST AT THE ELECTRICALLY WELDED JOINT, examine the joint.

STAYS CANNOT SLIP. They are always just where they were put. Stay and strand wires become one piece when the union is made. The fence is like a solid sheet of perforated steel.

Every Rod is Guaranteed Perfect.

Don't allow your prejudice in favor of the rapidly declining and now antiquated methods you have heretofore known to warp your good judgment.

"PITTSBURGH PERFECT" FENCES REPRESENT PROGRESS, because hundreds of thousands of dollars worth of standard material is daily welded by electricity.

The hoop on the average sugar barrel in the isolated country grocery store is an electrically welded product.

If your wagon was made in a large factory, its tires were welded by electricity.

You will find electrically welded hoops on ice cream freezers and washing machines. Examine them.

"PITTSBURGH PERFECT" fences are made by this modern, simple and marvelous process, producing "THE WELD THAT HELD."

MR. FARMER! LISTEN, NOW. Every agent handling "PITTSBURGH PERFECT" fences is authorized to guarantee this:

"If this wire is not injured at the joints, but the fence is perfectly adapted to uneven ground. And the fence will not separate from the strands. That the fence is all right in every particular. Could you ask any more definite protection? Your complete satisfaction is absolutely guaranteed."
